### NOTICE OF AVAILABILITY TOTAL MAXIMUM DAILY LOADS (TMDLs) FOR WATERS AND POLLUTANTS IN THE STATE OF FLORIDA

Section 303(d)(1)(C) of the Clean Water Act (CWA), 33 U.S.C. §1313(d)(1)(C), and the U.S. Environmental Protection Agency's implementing regulation, 40 CFR §130.7(c)(1), require the establishment of Total Maximum Daily Loads (TMDLs) for waters identified by states as not meeting water quality standards under authority of §303(d)(1)(A) of the CWA. Each of these TMDLs is to be established at a level necessary to implement applicable water quality standards with seasonal variations and a margin of safety, accounting for lack of knowledge concerning the relationship between pollutant loading and water quality.

The TMDLs described in this notice are required by the 1999 Consent Decree entered in the case of Florida Wildlife Federation, Inc., et al. v. Carol M. Browner, et al., No. 4:98CV356-WS (N.D. Fla., Tallahassee Division, April 22, 1998). The waterbody impairments on Florida's 303(d) list that will be addressed by the TMDLs are listed below. These impaired waterbodies are located in the Upper St. Johns River basin.
